PROJECT EXPERIENCE

HTML Me Something — HTML Practice Page
- Used CSS and HTML to make a semi dynamic webpage.
- https://github.com/VanGalePark/html-me-something
- https://vangalepark.github.io/html-me-something/

TechJobs-Persistent — Java/Gradle Project for MVC and database practice
- Added Controllers, Models, and Views for Employer and Skills pages.
- Connected the project to a database in MySQL so that Job entries would be saved.
- Setup a Many-to-Many relationship between Jobs and Skills so that a Job could have more than one Skill and a Skill can go to more than one Job.
- https://github.com/VanGalePark/java-web-dev-techjobs-persistent

Launch Checklist Form — HTML/JavaScript/Angular Project to make sure your shuttle is ready for launch
- Added validation popups if there is insufficient information.
- Everytime the page is reloaded you get a new planet to go to.
- Used JSON objects to get information for planets.
- A list at the bottom to explain what is and isn't ready after clicking submit.
- https://github.com/VanGalePark/orbit-report

WORK EXPERIENCE

Helper, CTI Solutions, 4315 Merriam Dr, Shawnee, KS 66203, Month 20XX – Present
- Filed invoices and other such papers.
- Loaded python code onto tablets to be used in Sprint stores.
- Painted an advertisement for their signage.

EDUCATION

LaunchCode, LC101 Programming Course — 2020
